## Profiles

- 🌐 [ExodusUA](#)
- 🔗 [exodus\\_env](#)
- 📘 [Mykola Perebenesiuk](#)
- 🌱 [Mykola P.](#)

Full-stack JavaScript developer with strong experience in **React**, **Next.js**, **Node.js**, and building production-ready web applications and Telegram bots. Worked on both **frontend-heavy products** and **API-driven systems**, including authentication, payments, CI/CD, and integrations with third-party services.

Comfortable working independently, owning features end-to-end, and collaborating with design, and product teams.

## Experience

### MarketBlitz October 2023 - December 2025

Full-stack developer / Team Lead Remote

🌐 <https://www.marketblitz.com>

- Built and maintained a Tap2Earn Web3 platform used by **10 000** users
- Took ownership of the overall **system architecture**, making key technical decisions for backend, frontend, and integrations
- Led development as a **Team Lead**: task planning, code reviews, technical guidance, and decision-making
- Set up **CI/CD** pipelines and deployment on VPS (Github Actions / PM2 / Nginx)
- Designed and implemented a custom CMS (**Node.js**, **MongoDB**) to manage users, content, and transactions
- **Integrated** authentication, payments, and third-party APIs
- Developed Telegram bots (**Telegraf**, **GramJS**) handling user onboarding and notifications

### Upwork January 2022 - October 2023

Full-stack developer Remote

🌐 <https://www.upwork.com/freelancers/~011cd47232c8c34537>

- Delivered **80+ freelance projects** with **100% job success** and *Top Rated* status
- Built **React / Next.js** frontends and **Node.js / Express** backends with REST APIs
- Developed **Telegram bots** (Telegraf) for automation, notifications, and user workflows
- Integrated third-party APIs, payments, authentication, and external services
- Worked with **MongoDB** and SQL databases (schema design, queries)
- Implemented **AI integrations** (OpenAI / ChatGPT) for business automation
- Handled projects **end-to-end**: requirements → development → deployment

## Education

### HYBPII September 2023 - December 2024

Information technology Master

### ДУІТ September 2021 - December 2022

Automation and computer-integrated technologies Master

## Projects
